PROFESSIONAL SUMMARY

Full-Stack Developer with hands-on experience building and deploying modern web applications, business platforms, dashboards, APIs, database-driven systems, and third-party integrations. Proven expertise across React, Next.js, TypeScript, JavaScript, Python, SQL, REST APIs, Supabase, PostgreSQL, and cloud deployment workflows.

Combines modern web engineering with deep background in **data analytics, business intelligence, and AI-assisted development**. Experienced in structured prompt engineering to accelerate requirements analysis, architecture, testing, debugging, and production delivery across the full development lifecycle.

TECHNICAL SKILLS

Frontend: React, Next.js, TypeScript, JavaScript, HTML5, CSS3, Responsive UI, Vite	Backend: Python, Django, REST APIs, API Integration, Server-Side Architecture
Databases: PostgreSQL, SQL, Supabase, Relational Modeling, Queries, Aggregations	Cloud & DevOps: Vercel, Cloudflare, Production Deployments, DNS, Git, GitHub
Data & Analytics: Python, Pandas, NumPy, Matplotlib, Power BI, Tableau, Streamlit, Excel	AI Engineering: LLM-Assisted Workflows, Structured Prompting, AI Debugging & Documentation

PROFESSIONAL EXPERIENCE

FULL-STACK DEVELOPER • Asteria Technology Jan 2026 – Present • Abuja, Nigeria

Develop and maintain production web applications and business platforms using modern frontend technologies, APIs, databases, and third-party integrations.

- Architect and optimize storefront, dashboard, checkout, order-management, and administrative workflows across client applications.
- Integrate shared backend services and payment APIs, managing transaction status handling, checkout redirects, and order confirmation flows.
- Implement core business rules and API workflows for product availability, merchant inventory limits, payment states, and customer experiences.
- Diagnose and resolve cross-environment bottlenecks spanning API communication, client state, authentication, and deployment pipelines.
- Collaborate with stakeholders to translate product requirements into maintainable task breakdowns and production-ready features.

SENIOR IT ADMINISTRATIVE STAFF / PROJECT MANAGER • LINS Consult Oct 2022 – 2025 • Nigeria

- Managed technology-related activities, research initiatives, digital workflows, and end-to-end project delivery for client engagements.
- Translated complex client requirements into structured technical specifications, project milestones, and actionable development tasks.
- Coordinated cross-functional teams, managing deliverables, critical deadlines, and technical resource requirements.
- Spearheaded development and continuous improvement of internal digital systems, training platforms, and automated reporting workflows.
- Formulated operational problem assessments and implemented practical technology, digitization, and automation solutions.
- Maintained comprehensive project documentation, progress reports, system specifications, and implementation audits.

PROFESSIONAL EXPERIENCE (CONTINUED)

DATA ANALYST / SOFTWARE & ANALYTICS • Big Data Consult

Jan 2022 – 2024 • Nigeria

- Developed analytical and software-driven solutions that transformed large datasets into actionable business intelligence.
- Built automated dashboards and reporting systems using Python, SQL, Power BI, Streamlit, and Excel to monitor operational KPIs and performance trends.
- Extracted, cleansed, and analyzed 100K+ records using SQL and Python to identify customer behavior, purchasing patterns, and operational inefficiencies.
- Automated recurring reporting workflows, cutting manual data collation and expediting executive access to business data.
- Applied statistical analysis and predictive forecasting to support operational capacity planning and management decision-making.
- Maintained rigorous data validation rules, schema integrity, and confidentiality across all analytical repositories.

SELECTED SOFTWARE & TECHNOLOGY PROJECTS

Atlas AI Trading Intelligence Platform

Next.js • Python • FastAPI • PostgreSQL/TimescaleDB • Redis • LangGraph • LLMs

- Co-architected an AI-driven market intelligence platform focused on research, analysis, and decision-support workflows.
- Engineered modular separation of frontend UI, Python scanning services, data providers, Redis streams, and persistence layers.
- Applied LangGraph workflows and custom LLM adapters to orchestrate multi-agent data processing and intelligent research queries.

Business & Training Management Platform

Next.js • React • TypeScript • PostgreSQL • Prisma • Supabase

- Engineered frontend workflows for a corporate training platform supporting registration, sessions, quizzes, evaluations, and resource distribution.
- Implemented robust browser-based participant session handling and modular workflows compatible with existing backend microservices.

Shared Payment Integration Platform

Next.js • React • TypeScript • REST APIs • Payment Gateways

- Integrated multiple storefront applications with a unified payment backend to provide a consistent payment-processing pipeline.
- Resolved edge-case frontend/API synchronization issues involving pending payments, webhook delays, stock limits, and order visibility.

Shushan Global Cross-Border Business Platform

Next.js • TypeScript • React • CSS • Resend • Vercel

- Delivered a production commerce website with responsive service catalogs, quote calculators, contact workflows, and custom SEO configurations.
- Integrated multi-channel enquiry channels (WhatsApp dispatch & Resend transactional email) deployed via Vercel with custom DNS.

SPECIALIZED DOMAIN FOCUS

AI & PROMPT ENGINEERING

Structured LLM Workflows: Specialize in prompt engineering to accelerate software architecture, implementation, debugging, and code reviews.

Engineering Acceleration: Leverage Gemini, Claude, and ChatGPT for rapid task decomposition, automated test cases, and rigorous technical documentation.

DATA & ANALYTICS STRENGTHS

Large-Scale Analysis: Processed 100K+ transaction records to detect operational bottlenecks and behavioral patterns using SQL & Pandas.

Predictive Modeling: Formulated healthcare attendance framework analyzing 1,000+ records to investigate attendance patterns and forecast potential no-shows.

EDUCATION & CERTIFICATIONS

Bachelor of Science (B.Sc.) in Computer Science

National Open University of Nigeria • Expected 2027

Ordinary National Diploma (OND) – Science Laboratory Technology

Delta State Polytechnic, Otefe • 2015

Google Advanced Data Analytics Certificate

Professional Credential • 2024

Python Developer Certificate

Professional Credential • 2023
